Jacob & Lohman (1952)

Test Data :

Hydraulic head :  $2.81\text{e}+01$  m

Radial distance : 0.084 m

Hydraulic parameters :

Transmissivity T :  $1.22\text{e}-05$   $\text{m}^2/\text{s}$

Storativity S :  $2.59\text{e}-05$

Radius of influence Rd : 113.2 m

Fitting parameters :

slope a :  $5.3\text{e}+02$  m

intercept t0 : 0.0067 m

mean residual :  $3.1\text{e}-08$  m

2 standard deviation :  $1.5\text{e}-05$  m

Root-mean-square :  $7.7\text{e}-06$  m
